

Preliminary award

Study tourney

e4e5 – 2016

During 2016 in the magazine there were published 30 original studies. The level was not too high but out of these I could have selected 9 works to be included in the award. Thanks for all participants! In the following pages you can find the awarded studies but first I have some general remarks and advices...

I really dislike when someone inflates the solution with dualistic variations and tries. In a win study only variations with unique winning white moves and tries with unique black refutations should be part of the solution. The real solution should tell the story alone and for analytical variations we have the computer...

Finally... Not all studies should be published! Or even better: not all studies should be even composed. Focus on your best ideas and dedicate them much more time. You will see a rise of quality in your work.

Budapest, 12.04.2017

Judge: Árpád Ruzs

Prizes

1st Prize (Zhukov, e4e5#112)

After Rinck, we have a modern master of the domination theme studies. Recently A. Zhukov has created several studies featuring surprising queen dominations. In this study, the magnificent queen sacrifice in the sixth move (6.Qc7!!) is followed by a queen domination. But that is not all! The study continues with a second phase: a logical study with foresight theme!

2nd Prize (Skripnik & Arestov, e4e5#98)

In the end of this study we find a problem-like position with Banny & Roman Themes. The mutual zugzwang position was already featured (with colours reversed) in a work by Skripnik (e4e5, 2013) but this is clearly a better achievement.

3rd Prize (Nielsen, e4e5#118)

Lively play with mutual sacrifices, pins and unpins, checkmates and a stalemate final. Starting position with perfect material equality, several pieces but still an enjoyable, human friendly play with good flow.

Honourable Mentions

1st Honourable Mention (Tarasiuk, e4e5#121)

Black tries the famous trick invented by the Sarychev brothers (Kc8!!) but white avoids that by chasing away the king from the promotion square using a check.

2nd Honourable Mention (Tarasiuk, e4e5#116)

Logical study with black trying to keep the g3 square blocked but finally white succeeds to unblock it and can use it for a knight fork.

3rd Honourable Mention (Nielsen, e4e5#104)

Two knight sacrifices in a row and a deadly pawn battery.

Commendations

1st Commendation (Krug, e4e5#111)

Repeated manoeuvres to pass the right to move to black.

2nd Commendation (Hlinka & Vlasak, e4e5#106)

A king battery is formed one the first move but it is fired only much later. Meanwhile there are some nice moves along the battery line.

3rd Commendation (Arestov & Tarasiuk, e4e5#103)

King triangulation avoiding a mutual zugzwang position with two rooks against a queen.

A. Zhukov

Update: Unfortunately, the first prize study from the "HAY ЭПА-10", 2016 thematic tourney by the same author has the same ending but reversed flanks... Here the introduction is different but I still feel that I have to exclude this study from the final award. The next two HM studies will move a step up in the award.
